

# Full Stack Web Application Developer

## Job Description:

As a Full Stack Web Application Developer, you will be exposed to our high-tech Linux platform where you will design and build Web User Interfaces, API gateways, microservices web applications, and develop applications for charging and provision of telecommunications subscriptions. You will be part of our dynamic team working in an international environment.

## Requirements/Qualifications:

- Candidate must possess at least a Bachelor's/College Degree in Engineering (Computer/Telecommunication), Computer Science/Information Technology or equivalent.
- 2 to 4 years experience in Backend Web development(Web services and API)
- Experience in developing web services using NodeJS and ExpressJS
- Experience in ReactJS/NextJS
- Experience in using Mysql and NoSQL
- Experience in GIT and GitHub Flow
- Experience in 3rd party API integration is a plus (Payment Gateway, Headless CMS, 3rd Party Vendor)
- Experience in Redis and MQServer is a plus
- Ability to manage day-to-day responsibilities with minimal supervision.
- Analytical, results oriented, dedicated and a team player.
- Possess good communication and interpersonal skills; fluent in the English language.
- Willing to be assigned abroad for a shorter time.

We are a team of young and dynamic people who strives hard to balance work and play. We will give you the opportunity to broaden and develop your skills in a passionate, innovative and collaborative culture while working on a temporary work from home set-up. We assure you of many exciting projects with the latest technologies.
